RFQ Checklist: Anchor Bolts and Fasteners

Send this filled checklist to suppliers for faster, accurate quotes. Attach a drawing or photo if available.

Product	e.g., anchor rod / J bolt / through anchor / drop-in anchor / hex bolt _____
Size	M__ x ____ length _____
Thread	full / partial, thread length ____ _____
Material / grade	as per project requirement _____
Finish	zinc / HDG / stainless (as needed) _____
Quantity	_____ _____
Use area	indoor / outdoor / coastal / chemical area _____
Delivery	city + required date _____

Practical tips before you send the RFQ

- Mention the application (base plate, machinery, bracket, railing, MEP support) and whether vibration is expected.
- Specify environment: indoor, outdoor, coastal, or chemical exposure - coating choice depends on this.
- If the job is critical, ask for batch consistency and documentation (test/cert) as required by the project.
- For faster quoting, share a drawing, photo, or installation base material (concrete/brick/steel).
